👤 SUMMARY

Computer Science graduate from the University of Management and Technology (UMT) with a strong foundation in full-stack web development. Skilled in building responsive and user-friendly web applications using modern frontend and backend technologies. Familiar with developing RESTful APIs, working with databases, implementing authentication, and integrating frontend with backend services. Passionate about writing clean, scalable code and continuously learning new technologies to solve real-world problems.

🎓 EDUCATION

10/2022 – 07/2026
Lahore

Bachelor of Science in Computer Science
University of Management and Technology (UMT)

🧠 LANGUAGES AND FRAMEWORKS

Web Development

HTML, CSS, React.js, Flask, REST APIs

Data Analysis & Visualization

Pandas, NumPy, Matplotlib, Scikit-learn

Backend

Node.js, Express.js, RESTful APIs, Authentication & Authorization

Database Management

SQL, MongoDB, PostgreSQL, Firebase, Supabase

Machine Learning & Computer Vision

YOLOv8, XGBoost, OpenCV, PyTorch, TensorFlow, Scikit-learn, Model Training and Evaluation

Programming Languages

Python, JavaScript, C++, TypeScript

Development Tools & Platform

VS Code, Cursor, Google Colab, Jupyter Notebook,

📁 PROJECTS

E-Commerce Web Application

Technologies: React.js, Node.js, Express.js, MongoDB

- Developed a full-stack e-commerce platform with product browsing, search, filtering, and shopping cart functionality.
- Implemented user registration, login, authentication, and role-based access control.
- Built RESTful APIs for managing users, products, orders, and inventory.
- Designed a responsive interface for desktop and mobile devices.
- Integrated secure API communication between the frontend and backend.
- Implemented product and order management features for admin users.
- Optimized database queries and API performance for a smooth user experience.
- Implemented form validation and error handling to improve application reliability

Task Management System

Technologies: React.js, Node.js, Express.js, MongoDB

- Developed a task management application for creating, updating, deleting, and tracking tasks.
- Implemented user authentication and personalized task dashboards.
- Integrated frontend with REST APIs for real-time data management.
- Added task status, priority, deadlines, and filtering functionality.

Online Learning Management System

Technologies: React.js, Node.js, Express.js, MongoDB

- Built a web-based platform where users can browse courses and manage their learning activities.
- Developed separate functionality for students and administrators.
- Implemented course management, user authentication, and progress tracking.
- Created responsive and intuitive UI components using React.js.

Real-Time Chat Application

Technologies: React.js, Node.js, Express.js, Socket.io, MongoDB

- Developed a real-time chat application supporting one-to-one messaging.
- Implemented user authentication and online/offline user status.
- Used Socket.io for real-time message delivery.
- Stored user and chat data in MongoDB and designed a responsive chat interface.

 CORE COMPETENCIES

- | | |
|------------------------|-----------------------|
| • Problem Solving | • Team Collaboration |
| • Time Management | • Quick Learning |
| • Attention to Details | • Independent Working |
